Lean4Leaders

Lean4Leaders

Lean is often described as an approach for providing products or services that a customer requires on-time, of the right quality, at the right price, in the right amount, whilst meeting budgetary constraints and continually reducing costs.

This module will help learners to understand the concept of 'lean' and what can be achieved by adopting a 'lean' approach. It also provides sources of support and advice on how to help establish the principles within their organisation.

On completing this module, learners should:

- Know that whilst there are many types of constraint which may prevent businesses from achieving their full potential, 'lean' deals with two in particular – The elimination of waste & the empowerment of the individual.
- Be aware of the key steps in the 'lean journey'.
- Have gained a broad understanding of the key questions companies need to ask when considering implementing Lean.
- Be aware of what options are open to you on how to start implementing Lean.

Accreditation

The content of this course has been independently certified as conforming to universally accepted Continuous Professional Development (CPD) guidelines.

Duration

Approximately 2 hours. The length of time taken depends entirely on how quickly you can study and absorb the material. You can proceed as quickly or slowly as you like, and there is no limit on how long you can take to do the course.
